

Email Defense Service

The never-ending battle to protect email communications from spam, viruses and other threats can be particularly draining on organizations with limited IT resources or email threat expertise. Businesses that rely on efficient email communications can turn to Computrek Information Management Group (CIMG) for help in eliminating the email threats that sap productivity, increase storage, bandwidth and administrative costs, and put their networks at risk.

SPAM NOW ACCOUNTS FOR MORE THAN 85% OF ALL EMAIL TRAFFIC.....

Key Benefits:

- ◆ Simple, effortless activation
- ◆ Free up IT resources and reduce costs
- ◆ Integrate perimeter email protection
- ◆ Safeguard the integrity of business communications
- ◆ Increase employee productivity and control
- ◆ Implement effortless email filtering policy-setting including group policies
- ◆ Benefit from around-the-clock protection
- ◆ Effective multilayered defense against a wide range of email threats

Service Features:

- ◆ Spam Blocking
- ◆ Fraud Protection
- ◆ Virus and Worm Scanning
- ◆ Content and Attachment Filtering
- ◆ Outbound Message Filtering
- ◆ Policy-based Management
- ◆ Secure message delivery via Transport Layer Security
- ◆ Sophisticated Quarantine Management

The Best Defense:

CIMG Email Defense will block up to 99% of spam and can deposit suspect messages into external quarantine for future handling. Anti-spam rules and around-the-clock monitoring protects business from fraud, phishing scams and provides proactive defense against the latest phishing attacks. Specialized detection & filtering technology identifies, intercepts and blocks mass mailing worms, viruses and unwanted, inappropriate or malicious content before they enter or leave a network. As part of this service we also provide outbound message filtering which prevents distribution of sensitive or proprietary information and email disaster recovery providing storage as well as Web-based access, management and use during outages.

Web Defense Service

You just don't know who is out to get you. Operating without Web security increases your business risk from Web-based threats and unauthorized workplace internet usage. A proactive Web security solution is no longer "nice to have" but a "must have" for businesses that rely on the internet.

With the help of Computrek Information Management Group (CIMG), you can easily and effectively protect employees and network assets from Web-based threats such as spyware, viruses and phishing attacks, while also gaining control over unauthorized workplace internet usage. These Web-based threats evolve quickly and can drive up the cost to repair infected PC's, slow your network and place business-critical information at risk.

The CIMG Web Defense System provides enterprise-grade service and performance without enterprise-level complexity and cost.

More than 65% of PC's are infected with some kind of spyware-many within minutes of being turned on for the first time.

Service Benefits:

- ◆ Lower IT costs associated with removing malware from infected PC's
- ◆ Reduce business disruption
- ◆ Increase network capacity by limiting on-the-job surfing and blocking unauthorized bandwidth-intensive downloads
- ◆ Increase employee productivity
- ◆ Effectively enforce Internet usage policies
- ◆ Limit corporate liability due to employee access to inappropriate content
- ◆ Protect employees from fraud and the company from data theft and regulatory compliance violations
- ◆ Convenient month-to-month contract terms
- ◆ No hardware or software to integrate

CIMG's Email and Web Defense Service works to block the latest threats from spyware, viruses and phishing at your network's perimeter, before they can infiltrate your business.
