

Sales –Hardware & Software

Windows Small Business Server

A server is a specialized computer dedicated to managing shared resources. It controls access to other devices such as printers, fax machines, other computers, and to files and data.

Windows Small Business Server technology is a powerful advantage for your business. It will protect your data and help your network run dependably. It will release new productivity from your desktops while empowering your employees to do more and it will enable you to connect with your customers like never before.

Windows Small Business Server provides many of the networking features used by large companies without the complexity typically associated with server technology. It delivers a complete business server solution for businesses with 2 to 75 workstations and is available in two editions:

Standard and Premium. Computrek Information Management Group can assist you with all your Small Business Server requirements.

Feature/Benefit	Standard	Premium
Reliable Operating System and easy-to-use network tools including system back-up, mass fax service, and networking security	✓	✓
Internal team Web site for sharing documents, calendars, and tasks	✓	✓
Streamlined, professional email system	✓	✓
Integrated solution for managing and organizing email messages, schedules, contacts, and other information	✓	✓
Professional database system		✓
Website development tools		✓
Network security and system performance tools		✓

Computrek IMG's Sales department offers the latest in hardware, software, peripherals, and consumables - and all at competitive pricing. Whether you're looking for a new computer system or printer ink, we can help!

Sales –Hardware & Software

Staffed by friendly and experienced order desk staff, our CIMG Sales department ensures that clients receive rapid delivery of everything from consumable supplies to the latest systems and servers. Guaranteed contract pricing or budget friendly financing on a full range of products delivered through the North.

HP Certified Dealer

As a HP Certified Professional Dealer, we service and sell HP Compaq Business notebooks, desktops and servers locally. Forget the inconvenience and lost time of having to ship your system south for servicing. All work, including warranty service, is done either on-site or in our Sudbury depot.

Hardware

Computrek Information Management Group (CIMG) carries the latest in computer hardware for your business or personal needs. Servers, desktops, notebooks or PDAs from HP Business, fully serviced from our Sudbury depot. Our trustworthy sales staff will outfit you with the most modern technology at competitive pricing to meet your budget.

Software

CIMG provides the latest in software to help fulfill your business requirements. Server and desktop operating systems, Microsoft office suite or the latest in antivirus software for your daily business operations.

Peripherals

At CIMG, we have access to a full line of brand name printers, monitors, mouse and keyboards, USB drives, other peripheral devices and the corresponding cabling. If you need to run network cabling, call us and we'll give you a quote. What we don't have in stock, in most cases, can be ordered for next day delivery.

Consumables

Maintaining your printing devices, there is always the need for ink toner and cartridges. Give us the model number and we can have your replacement, usually the next day at prices that match or beat larger office supply stores.

Best Price at Time of Purchase

At CIMG, we don't have a warehouse full of stock collecting dust. We custom order your purchase the same day at the most current price, and in most cases with next day delivery. Call us at 566-3355 or come in and see Mike for all of your sales needs.
