

### **Integrated Information... Anytime, Anywhere**

Our approach to business intelligence can give you the freedom to access your integrated information system - anytime, anywhere. Our dynamic web applications are customized the way your business needs them, reducing processing steps for you and maximizing your time usage. Furthermore, our integrated web applications are accessible anywhere you have Internet access so your business information is always at your fingertips and it is always current.

### **Are some of these thoughts familiar to you and your business?**

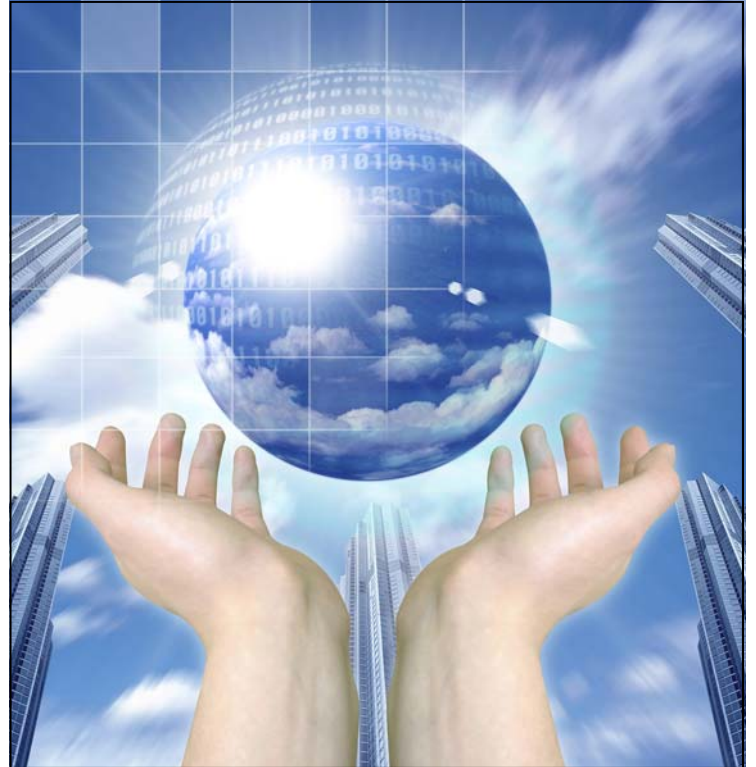

- ◆ We shouldn't have to enter data several times into several systems
- ◆ Why is it so hard to get useful information out of our corporate data?
- ◆ Our management team should be able to see how well the company is performing
- ◆ Our team should be able to access the information they need... at any time... from anywhere
- ◆ There must be an easy way for teams to share documents and collaborate more effectively

### **Changing Information Needs...**

You've invested time, resources and energy into information systems for your organization. These systems provide you with a decent view of what happened and when, but it doesn't allow you to capture a representation of the integrated picture - your business data as a whole.

### **Dynamic Analysis**

What if there was a way that people in your organization could have access to your corporate data, and further, they could run dynamic analysis of the data? What if there was a way to make this information portable so it could be analyzed offline on a laptop, or even from anywhere in the world over the Internet?

### **Web and Application Development**

Computrek Information Management Group (CIMG) provides a full range of web services including first-class website development, custom web programming and custom application development. Some of our areas of expertise include: database design, development and management, as well as web and application development, upgrades and testing.

Our cutting edge web and application development are geared towards your business needs in an effort to keep your organization running as smoothly and as efficiently as possible. We combine aesthetics, usability and functionality to save you time and money by bringing automation and robust performance into your business.

Our commitment does not end with the deployment of your solution. We fully support our products and offer technical assistance and training.

### Windows SharePoint Services

Windows SharePoint Services allows organizations, corporations and small businesses to create websites for information and document management and collaboration. Some of the benefits of using Windows SharePoint Services include: enhanced team productivity; allowing users to locate distributed information quickly; allowing team members to connect to and work with others more efficiently.

Here are some of the key features that Windows SharePoint Services has to offer:

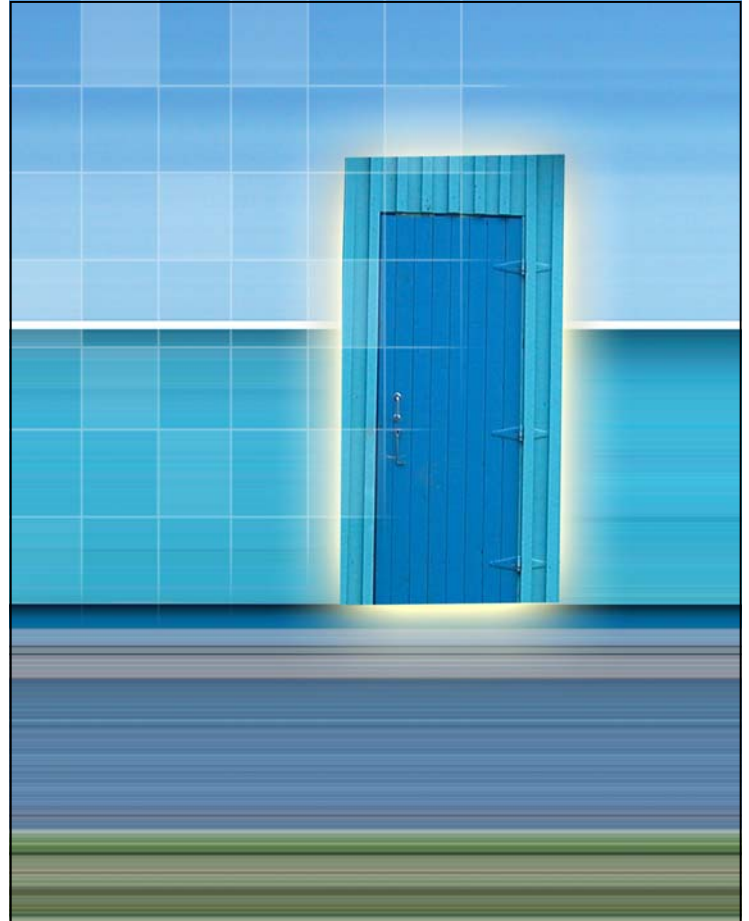

- ◆ Streamlined information and integrated applications
- ◆ Enhanced secure access and password-protected information
- ◆ Reduced paperwork with centralized documents and lists
- ◆ Continuous connectivity to current information and tools
- ◆ Integrated content management
- ◆ Access to information through the Internet using a standard IE browser

### Software Solutions

Applied information is the edge that sets your organization apart so we take the time to understand the bigger picture before proposing a solution.

We target the results that you want for your business and leverage our expertise to design and deliver effective solutions. Some of our areas of expertise include:

- ◆ Web development and website design
- ◆ Analysis and SQL reporting services
- ◆ Windows SharePoint services
- ◆ XML, Microsoft .NET
- ◆ Microsoft SQL Server
- ◆ Windows Small Business Server 2003

At CIMG, we create custom SharePoint sites, web-based applications, and software solutions that suit your business and website requirements.

**For solutions that will greatly improve your business productivity, team collaboration and employee efficiency, CIMG can help. You really can have Integrated Information... Anytime, Anywhere.**
